

Course Name						
MECHANICAL PROPERTIES OF MATERIALS						
Code	Semester	Local Credits	ECTS Credits	Course Implementation, Hours/Week		
				Theoretical	Tutorial	Laboratory
MET344E	6	2	3	2	-	-
Department/Program		Metallurgical and Materials Eng.				
Course Type		Required		Course Language		English
Course Prerequisites		None				
Course Category by Content, %		Basic Sciences	Engineering Science	Engineering Design	General Education	
		-	% 60	% 40	-	
Course Description		Stress and strain concept. Elastic and plastic deformation. Mechanical tests. Plastic deformation mechanisms and Plastic forming processes,. Strengthening mechanisms, solid solution, strain hardening, strain aging, diffusionless transformation, dispersion and precipitation hardening. Metallurgical failures. Linear Elastic Fracture Mechanics. Fatigue types. Factors affecting fatigue strength. Crack initiation and propagation. Creep and stress rupture. Mechanical behaviours of ceramics polymers and composites. Mechanical properties of nanomaterials.				
Course Objectives		<ol style="list-style-type: none"> To introduce basic stress-strain concepts and correlations between them, To introduce which mechanical properties are used to determine mechanical behaviours of materials under load, To introduce loading conditions leading failure and failure criteria, To correlate mechanical properties with internal structure 				
Course Learning Outcomes		<p>Students who pass the course will be able to:</p> <ol style="list-style-type: none"> Stress – strain concept and correlations between them, Mechanical properties and how to use them to determine mechanical behaviors of materials, Knowledge on strengthening mechanisms, Loading conditions on materials working under dynamic condition, Effect of internal structure on performance of materials Material behavior and failure mechanisms at elevated temperature. Mechanical properties of ceramic, polymer, composite and nanomaterials. 				
Textbook		Kayalı, E.S., Çimenoğlu, H., Malzemelerin yapısı ve mekanik davranışları, İTÜ Kimya-Metalurji Fakültesi, Ofset Atölyesi, İstanbul 1986.

Homework & Projects		Students will be given a homework assignment and a subject to be presented in the class. Homework assignments and presentation subjects may be used as a source for exams.				
Laboratory Work						
Computer Use						
Other Activities						
Assessment Criteria		Activities	Quantity	Effects on Grading, %		
		Midterm Exams	2	40		
		Quizzes				
		Homework	1	10		
		Projects				
		Term Paper/Project				
		Laboratory Work				
	Other Activities	1	10			
	Final Exam	1	40			

COURSE PLAN

Weeks	Topics	Course Outcomes
1	Introduction to stress and strain concept, elastic and plastic deformation	1
2	Introduction to Mechanical tests. Hardness, tensile and impact tests	1,2
3	Plastic deformation mechanisms and yielding criteria	1,2
4	Plastic forming processes	2,3
5	Strengthening mechanisms and their effects to mechanical properties	2,3
6	Fatigue types. High and low cycle fatigue	2,4
7	Failures related to fatigue	2,4,5
8	Introduction to fracture mechanics and fracture tests	2,4,5
9	Plain strain fracture toughness, fatigue crack growth	2,4,5
10	Creep, stress rupture and stress relaxation concepts	2,6
11	Creep mechanism maps	2,6
12	Mechanical properties of ceramics and polymers	2,7
13	Mechanical properties of composites	2,7
14	Mechanical properties of nanomaterials	2,7

Relationship between the Course and METALLURGICAL AND MATERIALS ENGINEERING Curriculum

	Program Outcomes	Level of Contribution		
		1	2	3
1	Ability to apply the knowledge of mathematics, science and engineering principles to solve problems in metallurgical and materials engineering (ABET:a)			X
2	Ability to characterize materials using standard and/or self designed experimental methods and to evaluate the results (ABET:b)		X	
3	Ability to design a system or a process, taking into consideration of the desired specifications, quality, ethics and environment. (ABET:c)			
4	Ability to communicate both orally and in the written form and to take part in, and provide leadership of the teams in the elucidation of engineering problems; (ABET:d, g)			
5	Ability to define, formulate and solve engineering problems in the development, production, processing, protection and usage of engineering materials. (ABET:e)			X
6	An understanding of professional and ethical responsibilities(ABET:f)			
7	An understanding of current/contemporary issues and impact of engineering solutions in broad cultural, national and global levels;. (ABET:h, j)			
8	A comprehension of the nature of engineering progress closely linked with the development of new materials and production processes. An ability to engage in life-long learning and a recognition of its necessity (ABET:i)		X	
9	Ability to use essential tools and techniques of modern engineering in the development, production, processing, protecting of the existing and new engineering materials. (ABET:k)		X	

1: Little, 2. Partial, 3. Full

Course relationships with major elements of the field and material classes

		Level of Contribution		
		1	2	3
MAJOR ELEMENT OF THE FIELDS	STRUCTURE			X
	PROPERTIES			X
	DESIGN EXPERIMENT/ANALYSE DATA			X
	PROCESSING		X	
	COST/PERFORMANCE	X		
	QUALITY/ENVIRONMENT	X		
	DESIGN PROCESS OR PRODUCT	X		
MATERIAL CLASSES	METAL			X
	CERAMICS		X	
	POLYMERS	X		
	COMPOSITES		X
